General Engineering Contractor **CCL #427772 Class A, B**

Michael H. Clement Corporation provides comprehensive design, development, prototyping, manufacturing, and field services tailored to mechanically based products. Our team has 30 years of engineering experience with machines in a wide range of industries including aerospace, automotive, computer, environmental, and food processing. We understand the entire life cycle of a working machine and can use that know-how to solve your unique problem. If you need a building to house your machines, we can build that, too. We specialize in finding workable, cost effective solutions when no one else can.

Michael H. Clement Corporation operates a machine shop and fabrication facility allowing us to build almost anything we design. We also offer job shop manufacturing services, warehousing of manufactured parts, and just in time parts delivery. If your problem cannot come to us, we can come to you! We offer field services for problem machines and emergency engineering problems.

COMPLETE ENGINEERING SERVICES

Machine Design

- Concept to Practice
- Hydraulic Systems
- Improve a Machine
- Jigs and Fixtures
- Modify a Machine
- Pneumatic Logic
- Pneumatic Systems
- Product Design
- Prototyping
- Redesign for Manufacture
- Tool and Die Design
- Documentation
- Illustration
- Mechanical Drawing (CAD)

Research and Development

- Creative Solution Round Table Discussions
- Patent Development
- Product Development
- Proof of Concept
- Reverse Engineering

Job Shop Manufacturing

- Any Size Job
- Computer Assisted Manufacturing (CAM)
- Computer Controlled Tools
- Manual Tools
- Repairs
- Retrofitting
- Rush Jobs

Manufacturing Consulting

- Automation
- Manufacturing System Design
- Manufacturing System Maintenance
- Manufacturing System Optimization
- Production Line Design
- Project Logistics Support

Field Services

- Emergency Assistance
- Industrial Equipment Installation
- Machine Maintenance
- Machine Repair
- Machine Upgrades
- See and Understand Your Problem

Construction

- Construction Logistics Support
- Unusually Difficult
- Unusual Location
- Unusual Requirements
